

FUND OBJECTIVE & INVESTMENT POLICY

To provide a high level of income and the potential for capital growth. The Fund invests in a range of asset classes and currencies to achieve a consistent yield and moderate capital appreciation measured in US Dollars. The Fund has a global mandate and may allocate capital across equities, bonds, property related stocks, commodities (through investment in ETFs) and cash and cash equivalents depending on the Investment Manager's consideration of the prevailing risk/return profile for each asset class. As a result of the diversification of currencies and asset classes, the Fund is deemed to be moderate risk in nature.

SOURCE

Source for all data is BBH Administration Services (Ireland) Ltd and Bloomberg Finance L.P. All performance is presented net of fees. Periods greater than 1 year reflect an annualized performance figure (see regulatory statement for definition). Performance is based on daily recurring investment. No income distributions are made – all investment income is re-invested. Performance is based on monthly closing NAV figures. Past performance is not indicative of future performance. Actual annual figures are available upon request.

*NOTES

09/01/2015: High Street Global Balanced Fund changed the custodian from Saxo Bank to Brown Brothers Harriman in order to convert to a UCITS structure. The rationale for the transfer was that this structure would provide clients with a unitised product governed by European legislation. The same decision-making personnel remain with the fund following the transfer, and the mandate remained similar to that adopted under the custodianship of Saxo Bank. In order to facilitate the transfer, performance for the month of December 2014 reflected the change in NAV from 30 November 2014 to 8 January 2015. Similarly, performance for the month of January 2015 reflected the change in NAV from 8 January 2015 to 30 January 2015. The High Street Global Balanced Fund, a sub-fund of Sanlam Universal Funds Plc, launched as a UCITS IV fund on 9 January 2015. Prior to this, the strategy existed under the previous High Street Global Balanced Fund with the assets transferring from Citibank to Brown Brothers Harriman with the launch of the UCITS structure. For the purpose of presenting the performance returns, the performance of the Fund started on 9 January 2015, while the performance return for the strategy includes the full performance for the month of January (to include the performance of the assets for the period 1 January 2015 to the launch date, 9 January 2015).

INVESTMENT MANAGER MONTHLY COMMENTARY

The fund returned -0.57% for the month of August relative to equity (MSCI World Total Return Index) down -2.05%, property (FTSE EPRA/NAREIT Developed Index) up 1.87% and corporate bonds (FTSE World Broad Investment Grade Bond Index) up 2.13%. The diversification and protection used in the fund helped largely avoid the losses seen in equity markets during the month. High levels of volatility were once again prevalent as a tug of war persists between the possibility of further interest rate cuts and heightened risks emanating from strained trade negotiations.

August began with a tweet from the US President announcing his intention to impose a 10% tariff on the remaining USD 300bn of Chinese imports from the first of September. This caught the market by surprise as a sense of optimism had built following the recent resumption of trade talks between the two world economic powerhouses. Investor concerns, which were already heightened on the back of poor economic datapoints, increased and amplified the threat of an impending recession. This triggered a decline in world equities; safe havens soared and interest rates declined as investors sought the safety of bonds. Our property portfolio benefitted as rates play an important role in the pricing of these instruments. Unfortunately, our corporate bond portfolio didn't benefit to the same degree, as their duration is very low. However, we still enjoy a relatively high yield of 3.8% from these positions which aids in reducing overall fund volatility. Looking forward, trade uncertainty will likely be trumped by the outcome of the Federal Reserve's (Fed) interest rate announcement to be made on 18 September. We remain conservatively positioned in the fund as we believe the Fed may be more hawkish than what the market is currently factoring in.

During the month we increased our exposure to Japan. The Japanese Yen is viewed as a safe haven and is therefore likely to appreciate in value should the economic malaise persist or deteriorate further. Exposure was achieved through switching our stake in Alibaba for Softbank and purchasing a new position in Yahoo! Japan.

Softbank is an information technology holding company. Its major assets are:

- Alibaba (80% of net asset value)
- Domestic telecommunication operations (29% of net asset value)
- Vision Fund (18% of net asset value)
- Sprint (16% of net asset value)
- ARM Holdings (12% of net asset value)

Investor will notice that their assets make up 155% of net asset value. This is due to corporate level debt and potential capital gains tax obligations offsetting a portion of their asset value. As a result, Softbank is leveraged by approximately 50%. This does add a degree of risk but amplifies potential returns if Masayoshi Son, founding CEO, is able to continue executing on his strategy. Further credence is given to the investment as the share is trading at a significant discount of 40% to its net asset value compared to a historical average of 25%. We believe Alibaba, Softbank's core holding, is well poised to continue its expansion and we believe Softbank offers an entry price to this asset at a significant discount.

Yahoo! Japan is trading at a reasonable 20 P/E with a significant cash pile representing 37% of its market cap. Analysts who cover Yahoo! Japan have a 46% upside potential with fifteen buy and zero sell recommendations. We believe they offer an alternative way to profit from the growth in ecommerce through big data as opposed to the competing in the physical delivery space. Through their search engine and online payments system, PayPay, they are able gather a large array of customer data and offer a market leading advertising platform to ecommerce participants. As Softbank owns an indirect share of almost 30% in Yahoo! Japan, synergies can be achieved by leveraging off Softbank's dominant local presence.

** Please note that a change in fees has been approved by the Central Bank of Ireland. From now on we will no longer charge a performance fee. The management fee will remain at 1% with the remaining fund fees variable (currently at 0.36%), giving a total expense ratio of 1.36%. All our shareholders will have received correspondence from our administrators, Sanlam, on the 4th September advising them of this change. Please get in touch if you have any questions.

RISK & REWARD PROFILE (MODERATE)

Why is this Fund in category 4?

The Fund is rated as 4 due to exposure to shares and stocks, and the nature of its investments which include the risks listed below. The price of shares and the income from them may fall as well as rise and investors may not get back the amount they have invested. The Fund may invest in securities which may be difficult or impossible to sell at the time and the price that the seller would like which could have a negative effect on the Fund's management or performance. It may be difficult for the Fund in extreme market conditions to redeem its shares from a CIS or ETF at short notice without suffering a loss.

Investing in a CIS or ETF may lead to payment by the Fund of additional fees and expenses in relation to those CIS or ETF. The Fund may use FDIs for efficient portfolio management and hedging purposes. It may be that the use of FDIs causes losses to the Fund. As the investments of the Fund are in various currencies and the Fund is denominated in US Dollars your shares may be subject to currency risk.

What do these numbers mean?

They rate how a fund might behave and how much risk there is to your capital. Generally, the chance to make large gains means a risk of suffering large losses.

A **Category 1** fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a **Category 7** fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex (for example, 2 is not twice as risky as 1).

More about this rating

This rating system is based on the average fluctuations of the prices of funds over the past 5 years - that is, by how much the value of their assets taken together has moved up and down. Historical data, such as is used in calculating the synthetic risk indicator, may not be a reliable indication of the future risk profile of the Fund.

For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus.

FEE STRUCTURE

Schedule of Fees + Charges available upon request from the Investment Manager	
Minimum Investment	\$ 50,000
Initial Fee / Front End Load / Advice Fee	0%
Annual Investment Management Fee (Incl. VAT)	1% - Share Class A 0.5% - Share Class B 1.5% - Share Class C
SAMI Management Company Service Fee	Up to 0.15% of NAV
Exit Fee	0%
Other Annually Allowed Expenses	Trustees fees, custody fees, administration fees, director's fees, legal fees, audit fees, bank charges, regulatory fees, brokerage/trading fees"
TER – Total Expense Ratio	1.36%

Advice fee - Any advice fee is negotiable between the client and their financial advisor. An annual advice fee negotiated is paid via a repurchase of units from the investor.

Effective Annual Cost (EAC) is available at <https://www.sanlam.com/ireland/fund-range-and-documentation>

Total Expense Ratio (TER) | PERIOD: 2018/08/01 – 2019/07/31

Total Expense Ratio (TER) | 1.36% of the value of the Financial Product was incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's.

Transaction Cost (TC) | 0.23% of the value of the Financial Product was incurred as costs relating to the buying and selling of the assets underlying the Financial Product. Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

Total Investment Charges (TER + TC) | 1.59% of the value of the Financial Product was incurred

REGULATORY STATEMENT

The Fund is a sub-fund of the Sanlam Universal Funds plc, a company incorporated with limited liability as an open-ended umbrella investment company with variable capital and segregated liability between sub-funds under the laws of Ireland and authorised by the Central Bank. The Fund is managed by Sanlam Asset Management (Ireland) Limited, Beech House, Beech Hill Road, Dublin 4, Ireland, Tel + 353 1 205 3510, Fax + 353 1 205 3521 which is authorised by the Central Bank of Ireland, as a UCITS Management Company, and an Alternative Investment Fund Manager, and is licensed as a Financial Service Provider in terms of Section 8 of the South African FAIS Act of 2002.

The Sanlam Universal Funds Plc full prospectus, the Fund supplement, the MDD and the KIID is available free of charge from the Manager or at www.sanlam.ie. This is neither an offer to sell, nor a solicitation to buy any securities in any fund managed by us.

Any offering is made only pursuant to the relevant offering document, together with the current financial statements of the relevant fund, and the relevant subscription/application forms, all of which must be read in their entirety together with the Sanlam Universal Funds plc prospectus, the Fund supplement the MDD and the KIID. No offer to purchase securities will be made or accepted prior to receipt by the offeree of these documents, and the completion of all appropriate documentation. A schedule of fees and charges and maximum commissions is available on request from the Manager.

This is a Section 65 approved fund under the Collective Investment Schemes Control Act 45, 2002 (CISCA). Sanlam Collective Investments (RF) (Pty) Ltd is the South African Representative Office for this fund.

The information to follow does not constitute financial advice as contemplated in terms of the South African Financial Advisory and Intermediary Services Act.

Use or rely on this information at your own risk. Independent professional financial advice should always be sought before making an investment decision, not all investments are suitable for all investors.

Collective Investment Schemes (CIS) are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future performance. Changes in exchange rates may have an adverse effect on the value, price or income of the product.

Collective investments are traded at ruling prices and can engage in borrowing and scrip lending.

Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Actual investment performance of the portfolio and the investor will differ based on the initial fees applicable, the actual investment date, the date of reinvestment of income as well as dividend withholding tax. Forward pricing is used. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The performance of the portfolio depends on the underlying assets and variable market factors. Trail commission and incentives may be paid and are for the account of the Manager.

The Manager has the right to close any Portfolios to new investors to manage them more efficiently in accordance with their mandates.

Performance figures for periods longer than 12 months are annualized.
