

FUND OBJECTIVE & INVESTMENT POLICY

The Fund aims to deliver medium to long-term capital growth over time. The Fund invests in a diversified range of equities, preference shares, bonds, debentures, money market, fixed income, property markets and instruments based on the value of any precious metal. The equity allocation will be managed at a maximum effective exposure, including offshore equity, up to 75%. The Fund is permitted to invest in listed and unlisted financial instruments in line with the conditions as determined by legislation from time to time. The Fund will predominately invest in South African markets but is however permitted to include investments in offshore jurisdictions subject to the investment conditions determined by legislation from time to time. The Fund complies with Regulation 28 of the Pension Funds Act.

Investment Management Commentary

The Fund returned 2.14% for the month of November against a benchmark return of 3.44% and with the Rand depreciating by 4.23% against the US Dollar.

November was an exceptionally volatile month for the Rand due to split expectations from investors as to the South African Reserve Banks repo rate decision which took place in the latter half of the month. The final outcome was a 25-basis point increase, with SARB governor Lesetja Kganyago citing increasing inflation concerns as the basis for the decision. The market was not the only party split over what the outcome would be with Kganyago telling the financial press that the MPC vote was split 3:2, with three members in favour of a 25-basis point hike and the other two members voting to leave the repo rate unchanged. With South facing a more clouded growth forecast due to the new “Omicron” variant of Coronavirus, a non-unified central bank, and a current account which some are expecting to deteriorate in 2022, we continue to view the Rand as fragile over both the medium and the long-term. As we have mentioned in numerous communications with our investors in the past, the Fund employs a large Rand-hedge bias in an attempt to mitigate against South African specific risk over the long term.

Of the Fund’s local holdings, the notable outperformer during November was AngloGold, which returned 20.97%. During the month there were several international events which triggered bouts of negativity, leading investors to move money towards traditionally safer assets, specifically gold, and Anglo benefitted from a significant improvement in the gold price at the beginning of the month.

The most noteworthy international development was the continued decline in Chinese equities, as regulatory headlines and the broader macroeconomic picture continued to weigh on investors who have exposure to the worlds second biggest economy. Of the Fund’s Chinese holdings, Alibaba (to which we have a little over a 1% weighting) was the worst hit, falling more than 22% during the month.

The property segment of the portfolio continued its positive momentum in November. MAS real estate was the star performer, returning a further 7.88%, taking the shares year-to-date return to 52.18%.

DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. For any additional information such as Fund prices, brochures and application forms please go to www.prescient.co.za

FUND SPECIFIC RISKS

- Default risk:** The risk that the issuers of fixed income instruments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The issuers credit quality is vital. The worse the credit quality, the greater the risk of default and therefore investment loss.
- Developing Market (excluding SA) risk:** Some of the countries invested in may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.
- Foreign Investment risk:** Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.
- Interest rate risk:** The value of fixed income investments (e.g. bonds) tends to be inversely related to interest and inflation rates. Hence their value decreases when interest rates and/or inflation rises.
- Property risk:** Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.
- Currency exchange risk:** Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.
- Geographic / Sector risk:** For investments primarily concentrated in specific countries, geographical regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.
- Liquidity risk:** If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected.
- Equity investment risk:** Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

GLOSSARY SUMMARY

Annualised performance: Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest return: The highest and lowest returns for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

TER & TC

FEES * (Incl VAT)		The TER and TC ASISA Standard came into effect from 1 January 2016. This standard is to ensure that all ASISA members operate within the outcomes of TCF. Therefore, it is a requirement to disclose both the TER and TC numbers. Transaction Costs are not included in the calculation of TER hence we need to disclose both the TER and TC numbers separately and also Total Investment Charge which is the combination of TER and TC. This will impact the MDDs as we will have to disclose this and amend the disclaimer to cater for the definition of Total Costs.
Base Fee (including administration)	1.38%	
Performance Fee	0.00%	
Other Fees	0.21%	
Total Expense Ratio (TER)	1.59%	
Transaction Costs (TC)	0.31%	
Total Investment Charge (TIC)	1.90%	

* As at 30 November 2021
